

Capital Projects Symposium

November 8-10, 2026

Chelsea Hotel, Toronto

Where Mining Capital Project Leaders Align

When **CIM** and the **Management and Economics Society (MES)** combine their networks, the result is a rare concentration of expertise in one place.

At **CPS 2026**, mine owners, EPC/EPCM leaders, financiers, and technical specialists engage in candid, peer-to-peer exchanges about the real challenges shaping mining projects today.

If you are responsible for delivering capital projects on time, on budget, and with stakeholder alignment – this is where you connect and explore practical solutions.

What To Expect in 2026

Financing & Risk Reduction

Accessing capital and reducing development-stage risk.

Partnerships & Collaboration

New models shaping project delivery.

Sustainability & Policy

Where Industry Meets Government

Lessons Learned

Insights from both success and failure.

Contracting & Construction Strategy

Preserving value in volatile markets.
